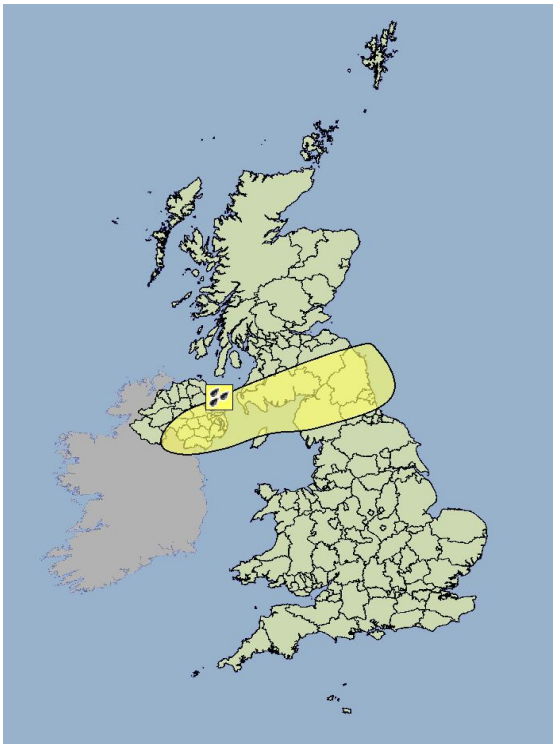
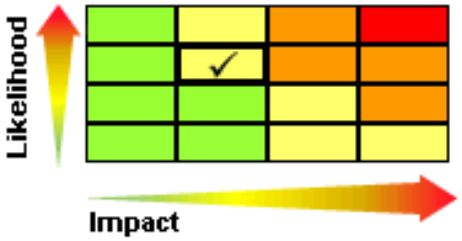
National Severe Weather Warning Service





Chief Forecasters Assessment
An area of low pressure will move eastwards from Northern Ireland and across the extreme north of England overnight bringing some areas of heavy rain. Although not everywhere in the area will see heavy rain, a few places may have around 15-20 mm of rain within an hour and up to 30 mm in 3-6 hours.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **21:00 on Sat, 03rd Sep 2016** until **07:00 on Sun, 04th Sep 2016**

An area of heavy and locally thundery rain will move across southern parts of Northern Ireland on Saturday evening before transferring east across southern counties of Scotland and northern counties of northern England during the early hours of Sunday. The worst of the rain should clear from Northern Ireland soon after midnight and from northern England and southeast Scotland on Sunday morning.

Please be aware of the risk of localised surface water flooding and disruption to transport, especially where heavy rain occurs over urban areas.
